

# OLIVIE PLUS 30x, the excellence!

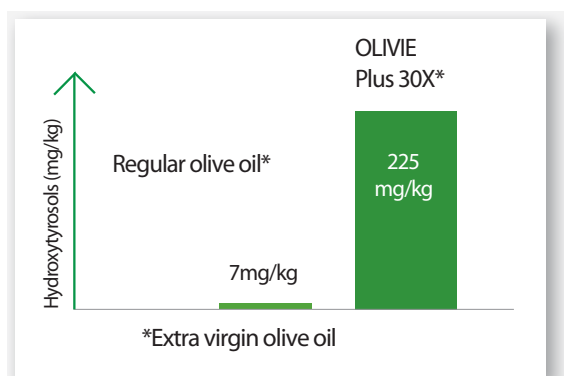

In case of bad cholesterol and triglycerides, excess visceral fat (fight against atherosclerotic deposits) and prevention of cancers (breast, colon, prostate, leukemia), neuro-degenerative diseases (Alzheimer's)

Health benefits largely increased compared to regular extra virgin olive oils.  
Arid soil and harsh desertic climate which induces a particular chemotype and therefore a level of 25 to 30 times higher in hydroxytyrosol and 10 times higher in total polyphenols.

## Composition

An extra virgin olive oil 25 to 30 times richer in Hydroxytyrosol (up to 233 mg / kg), the smallest and unique antioxidant able to pass the blood-brain barrier.

*Unparalleled must have through a soil which leads to a particular chemotype !*

## Unique process of production

The high concentration of polyphenols Olivie PLUS 30x is due to the special conditions under which the olive trees grew. The desert environment, the rocky soil and lack of water forced the olive to produce a high concentration of antioxidants to survive. Ecological suffering forced the tree to give the best of himself to protect themselves and us !

- ✓ No use of products contrary to organic farming.
- ✓ Olives grown in a desertic pollution-free virgin land without surrounding contamination.

## Actions and indications

- **Antioxydant** , protects against free radicals.
- **Anti-cancer**: breast cancer (normalization of the oncogenic Her-2/neu and Herceptine), prostate cancer, colon, leukemia...
- **Anti-inflammatory** (rheumatoid arthritis, ...)
- **Heart protection**
  - ✓ increases availability of nitric oxide (vasodilator)
  - ✓ suppresses platelet aggregation (reduces cell adhesion molecules: ADP, thrombin, collagen, ICAM-1 and VCAM-1)

CNK 3065-554

*"I will prescribe OLIVIE PLUS 30X broadly, without a prescription, but insistently in my oncologist job"* Professor Henri Joyeux

International Nutrition Specialist, Cancer Surgeon, Montpellier France University Hospital

- ✓ protects bad cholesterol LDL against oxydation  
→ **delays atherosclerosis and inflammatory reactions**

- **Anti-cholesterol**, positive results of physicians (clinical study after two months of prescription) :

- ✓ **20% decrease in cholesterol**: from 2,75 g/L to 2,27 g/L after 2 months.

- ✓ **30% decrease in triglycerides**: from 2,78 g/L to 1,98 g/L after 2 months.

- Against **hyperglycemia** and prevention of **diabetic complications**

- ✓ after 2 months, the level of glucose in the plasma of rats treated with Hydroxytyrosol decreased 55% compared to the untreated diabetic rats

- **Anti-aging**

- ✓ increases mitochondrial biogenesis
- ✓ induction of expression of proteins related to the durability of cardiac cells (PBEF, sirts, FoxOs)

→ **delays aging of tissues and the body**

- **Alzheimer**

- ✓ Hydroxytyrosol is the smallest antioxydant molecule by size and weight, and the only one able to cross the blood brain barrier. Hydroxytyrosol is thus able to better protect the brain cells against Alzheimer and Parkinson effects.

- ✓ inhibition of aggregation protein Tau (consequence of brain cells degeneration).

- **Psoriasis**

First positive results for 5 patients (disappearance of itching, decreased sclerosis, skin softer). Clinical study in progress on 40 patients. Dosis: 2 tablespoons per day accompanied by external applications (2-3 times daily).

- **Anti-microbial**

Acts as an anti-microbial pathogen on respiratory or intestinal tract (in uenzae Haemophilus, Moraxella catarrhalis, Salmonella typhi, Vibrio parahaemolyticus, Staphylococcus aureus, Haemophilus in uenzae, Moraxella catarrhalis, Salmonella, Vibrio, Vibrio alginolyticus, Vibrio parahaemolyticus, Staphylococcus aureus)

- **Constipation**, acts as a natural laxative with a consumption of 2 tablespoons before breakfast while fasting facilitates bowel movement.

## Dosis

2 tablespoons per day (fasting for constipation cases)

Local application (joints problems).
